DECISION

On the level of feed-in prices and premiums for electricity generated from renewable energy sources and in efficient cogeneration facilities

I

Guaranteed feed-in prices and premiums for electricity generated in power plants that use renewable energy sources and in efficient co-generation facilities are determined by this Decision in accordance with the Rule book on incentives for generation of electricity from renewable energy sources and in efficient cogeneration.

II

Guaranteed feed-in prices and premiums for electricity generated in facilities that use renewable energy sources or in efficient cogeneration facilities which obtain the right for incentive are:

2) Prices and premiums referred to in sub-point (1) of this point do not include value added tax (VAT)

III

Guaranteed feed-in prices determined in this decision are applied while buying out electric energy from generators who obtained the right to obligatory redemption of electric energy at guaranteed feed-in prices.

IV

The reference price referred to in this Decision in the amount of **0,0541 BAM/kWh** is applied while buying out electric energy from generators who obtained the right to the obligatory redemption of electric energy from old facilities in exploitation.

V

Premiums determined in this decision are applied while paying the premium to the generators that obtained the right to premium for electricity sold on the market or in consumption for their own needs.

VI

Guaranteed redemption prices and premiums referred to in subpoint I of this Decision are reexamined and harmonized in a way and with deadlines proscribed in provisions of Article 26 and 47 of the Rules on incentives for generation of electricity from renewable energy sources and in efficient cogeneration facilities.
